

Module PDF Quotation

Installation guide and Configuration

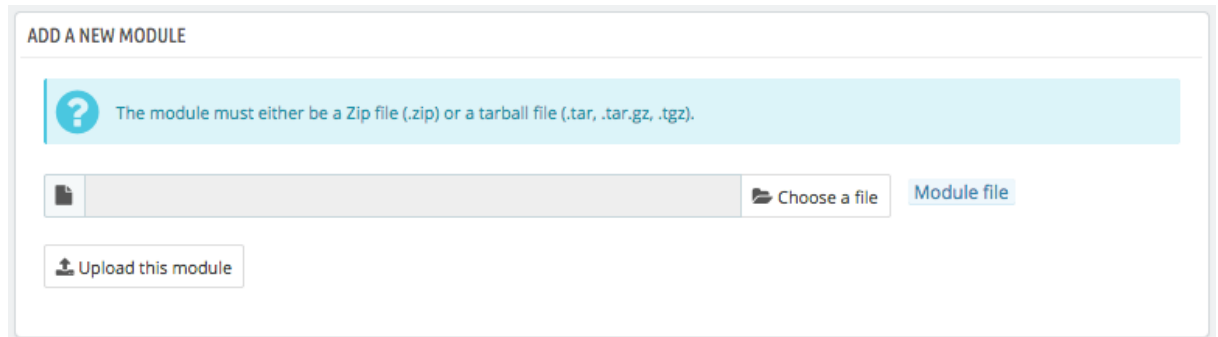

A. Installation	3
B. Module configuration	4
1. Access configuration	4
2. Module parameters	4
a. Email	4
b. Quotation prefix	4
c. Customization of quotation text	4
d. Height of header and footer	5
C. Add a language.....	6
D. Customize Quotation template.....	7
E. See Quotations.....	8

A. *Installation*

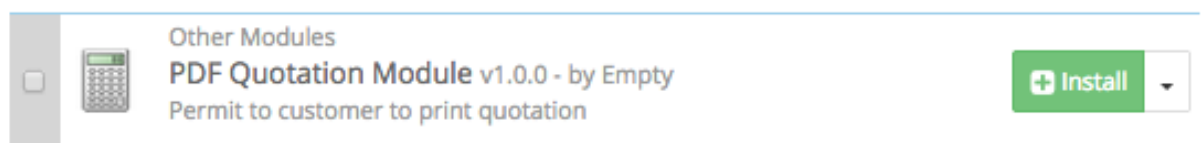

1. Go to menu “Modules and Services/ Modules and Services” of Prestashop
2. Click on “Add a new module” (at the top on the right)

3. Click on “Choose a file”

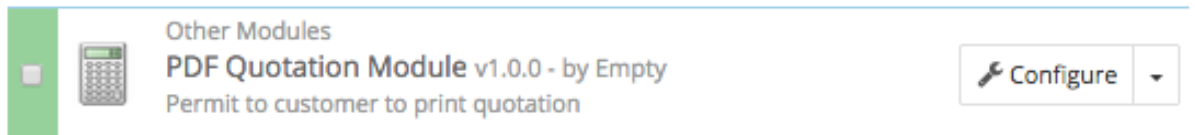

4. Choose file “pdfquotation.zip”
5. Click on “Upload this module”
6. In the module list, find “PDF Quotation Module”
7. Click on “Install”

B. Module configuration

1. Access configuration

1. Go to menu “Modules and Services/Modules and Services” of Prestashop
2. In the module list, find “PDF Quotation Module”
3. Click on “Configure”

2. Module parameters

a. Email

The seller can be informed when a new quotation arrived. You need to activate the notification.

Send Email to prevent new quotation

- ☐ Enabled
☒ Disabled

Fill your email to be informed.

Email

tom@sawyer.com

b. Quotation prefix

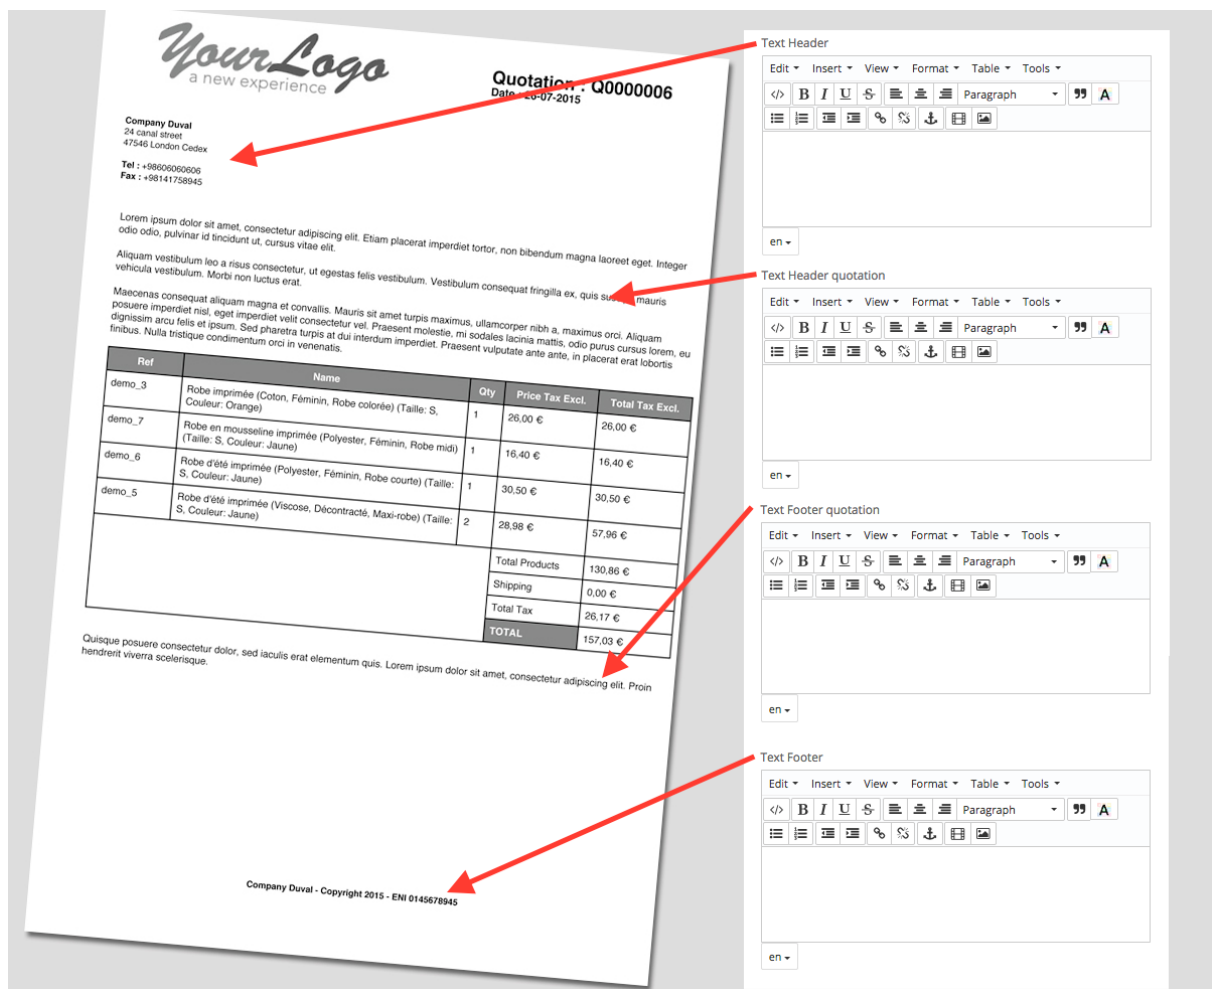

Your quotation has numbers that you can prefix with characters. This prefix is customizable.

Prefix number of quotation

Q

c. Customization of quotation text

Quotation text is customizable like the below screenshot.

COMMENT 1: Be careful not to format this field too much with bold/italic/colour... Prestashop is very sensitive to format when it generates a PDF document. If your PDF contains a blank zone, it's because Prestashop doesn't generate with success your zone. We suggest to put the least formatted text possible in this field.

d. Height of header and footer

It's possible that your quotation header is superposed by quotation. If you see this problem, we suggest to adjust the field "Height Header".

Height Header

55

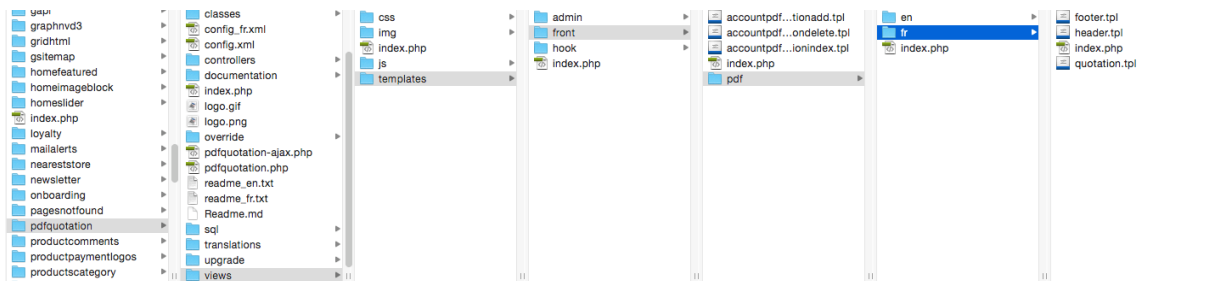

Specify height of header, it depends of the length of your header text. You must specify a value between 1 and 100. If you see that quotation text is under your header you must increase this value

It's possible too that the footer doesn't print totally. We suggest like previously to adjust the field "Height Footer".

Specify height of footer. it depends of the length of your footer text. You must specify a value between 1 and 50. If you see that footer isn't totally displayed, you must increase this value

C. Add a language

By default, the module is delivered in 2 languages, "French" and "English". If you wish to add a language to your quotation, you must go in "modules/pdfquotation/views/templates/front/pdf" and add a directory which name is the iso code of your language. For example "it" for Italian. Then copy the files "header.tpl", "footer.tpl" and "quotation.tpl" from the fr directory in the "it" directory, this will be used as your translation basis.

Then edit each of the 3 files and translate the fields in the added language as per below.

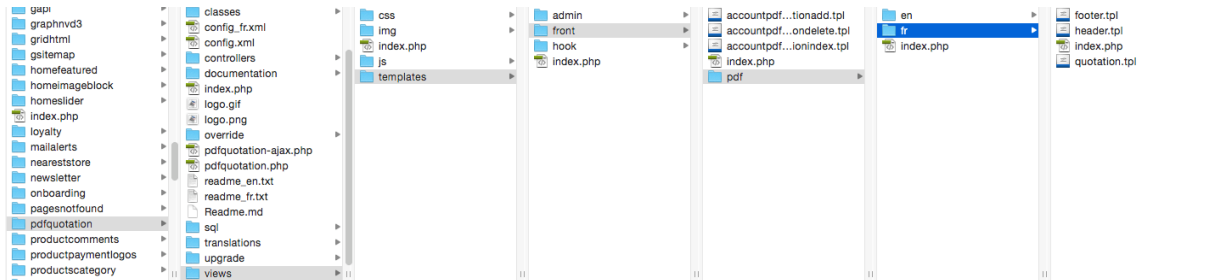

```
<table style="width: 100%;">
  <tr>
    <td style="width: 100%; font-size: 9pt; font-color: #404040;">{$before}<br /><br />

    <table style="width: 100% border="1" cellpadding="5">
      <thead>
        <tr>
          <td width="13%" valign="middle" style="font-weight: bold; color: #fff; background-color: #595959">
            Réf
          </td>
          <td width="49%" valign="middle" style="font-weight: bold; color: #fff; background-color: #595959">
            Désignation
          </td>
          <td width="6%" valign="middle" style="font-weight: bold; color: #fff; background-color: #595959">
            Qté
          </td>
          <td width="16%" valign="middle" style="font-weight: bold; color: #fff; background-color: #595959">
            P.U H.T
          </td>
          <td width="16%" valign="middle" style="font-weight: bold; color: #fff; background-color: #595959">
            Total H.T
          </td>
        </tr>
      </thead>
      <tbody height="1000">
        <foreach $products as $product>
          <tr>
            <td>{$product['reference']}</td>
            <td>{$product['name']}{if !empty($product['features_name'])} ({$product['features_name']}) {</td>
            <td>{$product['quantity']}</td>
```

D. Customize Quotation template

REMARK : this note is only for people who master HTML to avoid breaking the issuance of the quotation. If you see a mistake, don't hesitate to go back in your changes.

If you wish to customize your quotation, go to “modules/pdfquotation/views/templates/front/pdf” and enter in the directory of your language, for example “en” for English.

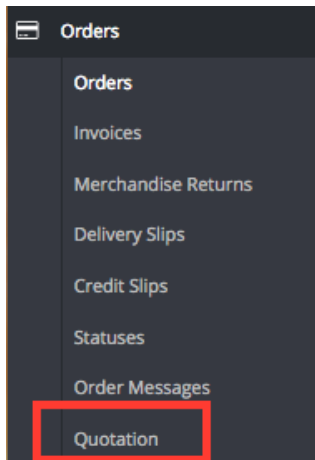

Then edit the files “header.tpl”, “footer.tpl” and “quotation.tpl”, and modify the template at your convenience.

```
<table style="width: 100%;">
  <tr>
    <td style="width: 100%; font-size: 9pt; font-color: #404040;">{$before}<br /><br />

    <table style="width: 100% border="1" cellpadding="5">
      <thead>
        <tr>
          <td width="13%" valign="middle" style="font-weight: bold; color: #fff; background-color: #595959;">
            Réf
          </td>
          <td width="49%" valign="middle" style="font-weight: bold; color: #fff; background-color: #595959;">
            Désignation
          </td>
          <td width="6%" valign="middle" style="font-weight: bold; color: #fff; background-color: #595959;">
            Qté
          </td>
          <td width="16%" valign="middle" style="font-weight: bold; color: #fff; background-color: #595959;">
            P.U H.T
          </td>
          <td width="16%" valign="middle" style="font-weight: bold; color: #fff; background-color: #595959;">
            Total H.T
          </td>
        </tr>
      </thead>
      <tbody height="1000">
        {foreach $products as $product}
          <tr>
            <td>{$product['reference']}</td>
            <td>{$product['name']}{if !empty($product['features_name'])} ({$product['features_name']}) {</td>
            <td>{$product['quantity']}</td>
```

E. See Quotations

To consult your quotations, go to menu “Order/Quotations”.

You can see all quotations on this interface:

The screenshot shows a web interface for managing quotations. At the top, there's a header 'DEVIS' with a count of '6'. Below the header is a table with columns: Id, Ref Devis, Prénom, Nom, Email, Téléphone, Être contacté, Supprimé par le client, and Date. The table contains 6 rows of data. To the right of the table, there are search filters for 'Du' and 'Au' with calendar icons, and a 'Rechercher' button. Each row in the table has a 'Voir le devis' button.

Id	Ref Devis	Prénom	Nom	Email	Téléphone	Être contacté	Supprimé par le client	Date	
1	Q0000001	Tom	Sawyer	tom@sawyer.fr	0606060606	Oui	✓	26/07/2015 16:44:47	Voir le devis
